

MEMBERSHIP PLEDGE

CARI member organizations agree to:

- Protect people and the environment in conjunction with sustainable economic development
- Ensure all employees understand and are able to fulfill their safety and environmental responsibilities
- Design and operate facilities based on efficient use of energy, resources, and materials
- Not willingly buy stolen materials and to work with law enforcement agencies to help recover stolen materials
- Comply with all legal requirements related to operations and products
- Refrain from making false or misleading statements about its products
- Work directly or through CARI with governments and the public to develop equitable and attainable recycling standards

Canadian Association of Recycling Industries

OUR MISSION

To optimize the economic, social, and environmental impacts across the commercial recycling industry.

About CARI

Founded in 1941, the Canadian Association of Recycling Industries (CARI) represents a broad range of companies in the recycling sector, from small family scrapyards to capital-intensive industrial plants that process, broker, and consume recyclable commodities. CARI members deal in all recycling materials but most work primarily or exclusively with metals.

INDUSTRY EVENTS

Every year, CARI organizes and hosts major networking events involving hundreds of key players in the Canadian and North American recycling industry.

Our annual CARI convention, chapter meetings, and yearly Consumers' Night gathering enable members to meet, share perspectives, and do business.

OUR CORE PRINCIPLES

- Recycling materials are not waste
- Recycling is the industry of sustainable development
- Recycling is an environmental solution
- Recycling creates jobs
- Canada should have a national recycling policy
- Governments should ensure that products are properly designed for effective recycling
- Governments should enact policies that increase the demand for recycled products
- Government legislation and regulations should be simple, distinguish recyclables from waste, and support free trade

MEMBERSHIP BENEFITS

- Cost-saving services
- Lobbying
- Communications
- Resources
- Networking opportunities
